Intermediate Git
a short course

You

can `commit`, `push`, and `pull` in simple cases, but you're unsure when and how best to use Git in your workflow; stopped in your tracks when you make a mistake; hesitant with branches because of merge conflicts; and too intimidated to prepare a pull request if you don't have push access.

Contact

Raman Shah (raman@uchicago.edu) for more information.

Attend

2 July	Understanding Git's Worldview
9 July	Ignoring Files and Fixing Mistakes
16 July	Branching and Merging
23 July	Collaborating on GitHub

Bring

a laptop running **Linux** or **Mac OS X** with access to U of C wireless, shell access, and a working copy of Git.

Thursdays 1–2 pm
CLSC 427

in the "Faculty Offices" section of the fourth floor
